

SIP Trunking

Expand Business Capabilities

SIP Trunking offers greater flexibility and cost savings than traditional ISDN PRI or T1 circuits. Making the move to SIP Trunking can simplify business telecommunications and open up opportunities for new advancements in unified communications.

Ardent Technology Group helps you transition businesses to SIP Trunking by helping you define their business needs and assist you with their network and equipment requirements. We'll also assist you with testing and porting their phone numbers.

The Benefits of Switching to SIP

RELIABLE

Our commercially supported service platforms are geographically redundant - designed for 99.999% uptime and reliability.

FLEXIBLE AND SCALABLE

Independent phone numbers move with each user. Add new numbers and trunks quickly.

SIMPLIFIED IT

Consolidate separate analog and TDM circuits, eliminate redundancies and make the most of the customer's bandwidth.

ENABLE UC

Easily implement Unified Communications and provide the benefits of Collaboration Tools, Video Conferencing, Presence, and more.

COST SAVINGS

Businesses can save up to 70% compared to traditional phone service.

PREPROGRAMMED FAIL-OVER

If your broadband goes down, you can reroute calls to other offices or cell phones.
